Marine Environment, Resource and Detection Technique

Introduction to Marine Science

C)

Programming C

Introduction to Marine Technology

Fundamentals of Circuit Analysis

Analog Electronic Technology

Digital Electronic Technology

Methods of Mathematical Physics

A

Fluid Mechanics A

Frontier Theory and Practice of Marine Science and Technology

Industry

Principles of Microcomputer and Interface Technology

Ocean Optics and Acoustics Foundation

Signal and System

Specialized English for Marine Technology

Ocean Survey

Principles of Underwater Acoustics

Underwater Probing and Positioning Technology

Ocean Remote Sensing

Marine Geographic Information System

Digital Signal Processing

Marine Ecology 2

Computational Methods 2

			Environmental Oceanography	2	
			Marine Chemistry	2	
			Physical Oceanography	2	
			Remote Sensing Image Processing	2	
			Science & Technology Documentary Reading & Summarization	1.5	
			Engineering Oceanology	2	
			Principle and Application of LASER	2.5	
			Principleand Application of Sensor	2	
			Underwater Sound Communication Technology	2	
			C++ C++ Program Design	2	
			Artificial Intelligence Oceanography	2	
		0402062	Structural Mechanics	2	
			Development and Management of Marine Resources	1.5	
			Seafloor Detection Technology	2	

_____专业　　划

		0701045	Practice for Moral, Ethics & Fundamentals of Law	0.5	
		0701043	Practice for Mao Zedong Thought and the Theoretical System of Socialism with Chinese Characteristics	1.5	
		2001007	Military Practice	2	
		1002801	AI General Physics Experiments I	1.5	
		1002802	AII General Physics Experiments II	1.5	
		1403024	Experiment of General Chemistry	1	
		1404058	Fluid Mechanics Experiments	1	
		0504011	Experiment of Circuit	1	
		0504106	Analog Circuit Experiment	0.5	
		0504107	Digital Circuit Experiment	0.5
